

# WASHINGTON CLEAN TECH ALLIANCE

## Weekly Report

PREPARED BY: BOSWELL CONSULTING

Friday, March 22, 2013

Since cut off last Wednesday, the House and Senate chambers have gone back to committee hearings. The Legislature is hearing bills that originated in the opposite chamber and passed over to either the House or Senate. The state revenue forecast was released on Wednesday, marking the beginning of the budget process. The revenue forecast was unexpectedly stable, which will hopefully help what is expected to be a long and controversial budget process with the House signaling a desire for additional taxes to fund education and the Senate Majority Coalition opposed to new revenue. The Senate is expected to produce their version of the state budget sometime in the next two weeks with the House shortly after that.

Governor Inslee has yet to weigh in with either a budget proposal or his package of clean tech concepts; however, both are expected in the near future.

- **E2SHB 1301** (creating clean energy jobs in Washington state through renewable energy incentives) was heard on Wednesday this week in the Senate committee on Energy, Environment & Telecommunications. Prime sponsor Representative Morris testified on the bill and explained how his intention with this bill is to *"get the state more proactive in solar technology without breaking the bank"*. This bill would replace annual cost-recovery incentive applications with a voucher entitling applicants to receive incentive payments for a term of ten years. Senator Honeyford expressed his uneasiness with this bill which would currently benefit only two companies, one of which has defaulted on payments within the last year. Honeyford was also concerned about the state's current economy and the possibility of the legislature being unable to fund this program for the next ten years, which would inevitably result in a lawsuit. This bill has generated significant controversy and it is unclear if it will continue through the process.
- **SB 5297** (concerning coal transition power) was discussed in the House Environment committee Thursday morning at 10:00 AM. Not much was said about the bill during its short public hearing on the 21st. It is hard to guess where the House stands on this bill currently.
- **SSB 5400** (allowing utilities serving customers in Washington and in other states to use eligible renewable resources in their other states to comply with chapter 19.285 RCW, the energy independence act.) The prime sponsor Senator Honeyford explained this week in House Environment how this bill will keep power rates low and will make prices affordable for everyone. The substitute bill only pertains to one utility. This bill would expand the geographic region for Pacific Power Corporation who serves customers in six other states, that way Pacific Power will be able to obtain eligible renewable resources.
- **E2SSB 5802** (developing recommendations to achieve the state's greenhouse gas emissions targets) had executive action taken March 21st in the House Environment Committee where the bill passed with a 9-2 vote.
